

Student Handbook 2022 - 2023

Vision

Every student will graduate with the choice of a high paying tech job or attend the college of their choice.

Mission

To prepare students for college and career in technology fields by collaborating with technology companies. Tech focuses on the academic, social, and emotional growth of the underserved youth in Albuquerque's Southeast Heights and International District.

How is Technology Leadership High School different than other High Schools?

Learning by Doing is a dynamic classroom approach in which students actively explore real-world problems and challenges and acquire a deeper knowledge. It is considered an alternative to paper-based, rote memorization, and teacher-led classrooms.

360 Support is where students receive support of social, emotional, and academic needs. This support occurs through our student support, academic and community engagement pillars. These three Pillars are the strong hold of the school for our students.

Industry Partners are collaborating with the teachers, co-facilitating projects, and supporting the students in the classroom. Through these partnerships, students are receiving knowledge that is real time in the tech world.

Exhibitions are the summative assessment for each student. The exhibitions are public and held four times a year. The exhibitions will demonstrate the student's knowledge, creativity and presentation skills.

Advisory time is when students are with their advocate and advisory family. The student's advisor serves as the point-person for the family within the school. Advisors will support, talk, engage, direct, guide, the students throughout their High School years.

Family Meetings are for the student, family, and advocate to attend. The purpose of these family meetings is to provide the student and advisor an opportunity to inform the family about what successes the students has experienced, what they have learned, what projects they are working on, where they are going with their learning, and what problems they are solving.

Positive Youth Development (PYD)

The Technology Leadership High School Student Conduct Policies are based on the premise that students are being prepared for careers in the technology profession. The rules will respect individual's constitutional and legal rights. The policies were designed using a positive youth development framework that engages students constructively in their developmental processes. Therefore, when disciplinary action is taken, it is done so to foster students' healthy and positive developments. Guidelines for appropriate expectations and consequences are noted in this handbook.
