Technology Leadership High School Relocates to a State-of-the-Art Facility in the International District

[ALBUQUERQUE, NM] - Technology Leadership High School (TLHS), a leading charter school in innovative education, is thrilled to announce its relocation to a brand-new, state-of-the-art facility. The new location, stationed on the corner of Marble and Quincy, is located at 5000 Marble NE, 87110 and marks a significant milestone in TLHS's commitment to providing exceptional learning environments for its students.

Scheduled to open its doors in August 2024, the new TLHS campus spans an impressive 60,000 square feet and boasts a modern, three-story design. This move represents an exciting chapter for TLHS as it expands its capacity to nurture the next generation of socially aware technology leaders and innovators.

The new TLHS facility offers an array of features designed to enhance the educational experience and foster a vibrant learning community. Among the highlights are spacious community areas that will be utilized to hosting meetings and events, a serene courtyard for outdoor activities, and specialized labs including a Makerspace Lab, Science Lab, and Math Lab.

In line with TLHS's commitment to holistic student well-being, the new campus will also feature amenities such as washer/dryer facilities and a School-Based Health Clinic, ensuring that students have access to essential resources for their physical and emotional health.

One of the most exciting aspects of the new TLHS campus is its focus on providing students with opportunities for hands-on learning and exploration. Classrooms equipped for onsite dual-credit programs will enable students to earn college credits while still in high school, giving them a head start on their academic and professional journeys.

Looking ahead, TLHS has ambitious plans for the future of its new facility. Upon completion of renovations, students can look forward to additional amenities including an indoor soccer field, an indoor fitness space, and the integration of sustainable practices such as solar panels. A dedicated STEM lab will further support TLHS's commitment to fostering excellence in science, technology, engineering, and mathematics education.

"We are thrilled to embark on this new chapter in the history of Technology Leadership High School," said Cynthia Ramirez, Executive Director of TLHS. "Our new campus will not only provide a cutting-edge learning environment but also serve as a hub for student well-being, innovation and collaboration within the Albuquerque community."
